## CHANGING OF THE SEASONS

Another season has passed and the time has come for the new Spring monarch to be crowned. The vernal equinox yesterday triggered the passing of the crown—we hope. With the Winter Queen currently missing from contact and very few Spring courtiers to choose from, has the Season even chosen its monarch? Our former Spring King, Felipe Ruiz, is also nowhere to be found.

The few Spring courtiers interviewed for this article expressed confusion and none knew or claimed to be the current reigning monarch. The antlered crown of Spring does not appear over anyone's head.

Has something gone wrong this season as well? Is some strange and terrible mischief afoot? With former Autumn and Winter monarchs disappearing and going out of contact, perhaps the new Spring monarch is afraid that they will be next?

Or maybe the seasons are just out of whack and are taking time to adjust themselves to changing times. Far be it for us all to assume something sinister in the works.

The rain heralds in the coming on Spring and the Freehold welcome our new monarch, whoever they may be.

## TWINKLE, TWINKLE LITTLE STAR

The sky is alight with stars, some of the most well-known constellations out this time of year. Orion, with his recognizable belt of three stars, and Sirius, also known as the Dog Star, of the constellation Canis Major. Most notable is the brightness of Sirius, easily found by using Orion's belt to point the way.

## NEW HOUSING DEVELOPMENT

A new housing development is being built for the homeless, the building is planned to go up in Lehigh Acres, near the corner of SR 82 and Lee Blvd. Funds for the development were provided by an unknown benefactor to the city of Lehigh.

Ground breaking began three weeks ago. Many of the Changelings in the area with no resources may be interested in looking into this development for future accomodatins.
