=====

Current Projects:

Chapter Website
Begun: April 2008
ETA: May 2008

We are currently working on a website for the Chapter; it is about 60% complete. We are building a member area, as well as resources for members to quickly and easily find out when and where games, meetings, and socials are being held. Members will also be able to keep up to date with Chapter news, submit prestige, be able to find archived Chapter reports, and find links to important Camarilla websites such as the SE Region site, the Addendum, the CRD, and the Approvals Database.

Member Education – Prestige Tracking

We are starting to set up dates and times for members to get together with the CC and ACC to learn how to track their prestige and the format that should be used for both submitting prestige for the month and using the National Excel Template for personal tracking.

Member Education – Approvals

We are starting to set up dates and times for members to get together with the VSTs to learn how to access the Approvals Database, how to write approvals using the correct format, and how to write a successful application. We will be going over the application questions and answering any confusion about them. David Hofmann, ARST Requiem, has offered to help with this as well.

Prestige Log Reviews

I am assisting members who request help with their prestige logs to build/update their logs for when they go to Regional/National for review and MC verification for upcoming conventions.

Problems: None
